COMPANY PROFILE 2024/2025

As an Interior Fit-out and MEP company we strive to be known for providing safe, efficient and innovative spaces that represent its owner. We are working towards setting a higher standard in quality and reliability by contributing to the region's growth by delivering infrastructure that supports both businesses and communities.

Our mission is to provide a simple construction process by providing MEP and Interior Solutions that is a combination of functionality and innovative design. At Vexel we believe services must not only be durable but also cost-effective along with timely completion. Therefore the projects we undertake are done with the highest standards along with our client's long-term goals in mind.

Vexel is your partner in providing you with high quality Interior Fit-out and MEP (Mechanical, Electrical, and Plumbing) services based in Qatar. Throughout the years Vexel has worked with businesses and property owners to strive to provide them with efficient infrastructure and also create a space that is functional and well designed. Our scope of work stretches across residential, commercial and industrial sectors. All our projects are a testament to our focus on quality, safety and timely completion.

What Sets us Apart?

At Vexel, the main aim is to build a level of relationship with the clients where they are able to easily communicate their ideas and we try to bring idea to reality for them. By providing them with high quality interior finishes and by installing reliable MEP solutions its our goal to ensure that our clients expectations are not only met but exceeded. We try to bring forth designs and technical expertise that suits each person's necessity and style.

TURNKEY SOLUTIONS

Vexel's Turnkey Solution provides end-to-end project delivery, where every phase completed is done with utmost precision and by experts. Be it the first drawing of the project or the final works, each and every detail is taken care of. So that you receive a project that is fully functional and ready to live so that you won't have to face the difficulty of connecting with multiple contractors.

Our services cover a wide range of essential works, including:

- Civil Works
- Interior Design & Execution
- HVAC Systems
- Electrical Installations
- Fire Protection & Alarm Systems
- Access Control Systems
- LAN & Data Cabling
- Electronic Surveillance Systems
- Audio Visual System

With Vexel's single-point project management, you benefit from streamlined communication, reduced costs, and timely delivery, ensuring your project is completed efficiently and to the highest standards.

INTERIOR

For a home to have a great interior means creating a space that is practical yet beautiful. A home must always serve the purpose of the person living in it. So at Vexel we take our time to understand what your ideas are and only then can the design we create truly reflect you and fit your lifestyle.

Be it planning the layout or when it comes to choosing the right materials, colors and furniture all procedures are handled with utmost care. The aim is to build a space that is welcoming, functional for the purpose and stand against the test of time. For us, we find it significant to maintain a clear communication of ideas throughout the lifetime of a project to ensure the timely completion and that too with maximum efficiency. Whether it's a home, an office, or a commercial space, the aim is to deliver interiors that are not only visually appealing but also comfortable and practical.

ARCHIT

While building a structure it should be a reflection of your ideas and needs, it must be a mixture of creative space that provides functionality. Also building requires several permits and approvals, our team strives towards delivering your ideas while following all necessary guidelines. We also believe in keeping our clients updated about every step, so that we can have a clear understanding and move with full support.

CONST

Turning plans into lasting structures with quality and care. We handle all aspects of construction, from groundwork to final finishes. Our experienced team focuses on quality, safety, and timely delivery, ensuring your project is built to the highest standards while staying within budget.

RESTORATION

We know that acting fast is key when damage occurs. Our restoration services focus on helping clients recover quickly while ensuring lasting results. Whether it's damage from natural disasters, wear and tear, or unexpected accidents, we assess the situation, develop a clear plan, and carry out the restoration efficiently. Our team handles everything from structural repairs to surface refinishing, ensuring your space is restored to its best condition. We prioritize quality and client satisfaction, keeping you informed at every step until the project is completed.

At Vexel the Civil Work service covers everything from foundation, we offer practical and reliable solutions for both small-scale improvements and large scale projects. Our works stand as a testament to durability that connects with modern designs. While carrying out our works we prioritize safety and precision in all procedures. We work closely with our clients to understand their needs, providing cost-effective options without compromising on quality.whether it's roadworks, drainage systems, or structural developments, we ensure that each project is built to withstand time while enhancing functionality and visual appeal.
